UV Sanitizing Cashdrawer
Healthy Change for Everyone, with every Transaction

According to the Federal Reserve, Cash is notoriously covered in bacteria and virus that can accumulate over a span of up to 15 years.

Our solution is…

Kills 99.9% of all harmful organisms on money

Helps reduce foodborne illnesses

Protects reputation of Chain & shows they care about their customer

Protects employees from illnesses

Protects customers from illnesses

*"The **UV Sanitizing Cashdrawer** system is the only practical way of eliminating microbial contamination from a product such as money."*
Dr. Fmnk Sorvillo, Phd.
Professor In-Residence,
Department of Epidemiology,
School of Public Health. UCLA

*"The **UV Sanitizing Cashdrawer** solution of killing harmful pathogens on cash is highly effective and should be considered by anyone concerned with the health and safety of their business."*
Jeff Nelken MA
Food safely & HACCP expert,
certified trainer with the FDA and
Los Angeles Health Department

The Patented **UV Sanitizing Cashdrawer** Anti-Microbial System

- Out of sight and seamlessly becomes part of the normal POS operation of any business.
- Simple, efficient, and cost effective.
- No change to the normal operation of the cash drawer.
- No reoccurring costs, or employee training.
- Does not add any harmful by-products to the environment such as undesirable color, odor, or chemicals.
- Costs pennies a day.
- This system delivers HEALTHY results.

UV Sanitizing Cashdrawer

Minimize common health hazards that populations face daily.

Our launch product is a germicidal UV-C light system designed to eliminate germs on money within conventional cash drawers. The patented technology consists of an intense, yet safely contained and controlled exposure of UV-C light. Established research shows germicidal UV-C's deadly effectiveness is 99.9% on Viruses, Yeast, Bacteria and Protozoa in less than ten seconds.

> *"The* **UV Sanitizing Cashdrawer** *System is the only practical way of eliminating microbial contamination from a product such as money."* – Dr. Frank Sorvillo, PhD., Professor In-Residence, Department of Epidemiology, School of Public Health, UCLA

Currently, money is one of the most unmanageable sources of germ transfer a business faces daily. It arrives through the front door, is handled by untold numbers of people before arriving, then by employees, and then handed back to the consumer. By analyzing genetic material on U.S. currency, NYU Researchers identified 3,000 types of bacteria. Several studies have found bills with very high levels of *coliform bacteria* (feces) contaminates, which can contain over 120 viruses, many of them still alive. (NYU Lab report in Wall Street Journal April 18, 2014)

> *"Cashiers and others working with large quantities of paper currency are vulnerable to catching various types of flu from germs living on notes. Flu viruses can survive on banknotes for 24 hours or up to 17 days."* – Yves Thomas, head of the National Influenza Research Centre at Geneva University Hospital

Businesses need a solution at key factor points that minimize or eliminate germ transfer via cash exchanges.

- A solution that is simple, efficient, and cost effective.
- A solution that is out of sight and seamlessly becomes part of the normal point of sale operation for any business.
- A solution with no re-occurring costs, no employee training or intervention.

> *"An intervention that would effectively prevent or treat the cold would have a huge clinical and economic impact, far greater than for chronic diseases that we hear about on a regular basis."* – Dr. Mark Fendrick of the University of Michigan Health System

UV Sanitizing Cashdrawer addresses these issues and concerns with a simple, efficient, cost-effective solution that will:

- Reduce exposure to germs from unknown sources
- Give consumers confidence when shopping. Look for the "**UV Sanitizing Cashdrawer**" logo.
- Protect the health of individuals and those close to them.
- Protect the health of employees.
- Protect against food contamination and food borne illnesses.
- Stop deadly germs from spreading via cash.
- Protect against germ transmission locally. Regionally, nationally, and internationally.
- Allow businesses to show they care about the health of the customer and employee.
- Potentially reduce sick leave and medial costs by averting illness.
- Play a significant roll in minimizing or stopping epidemics.

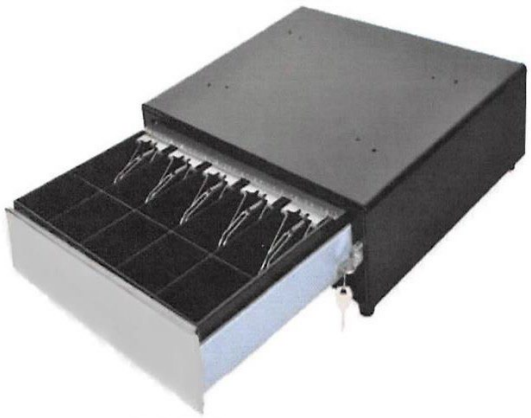
> *"The **UV Sanitizing Cashdrawer** solution of killing harmful pathogens on cash is highly effective and should be considered by anyone concerned with the health and safety of their business."* – Jeff Nelken MA, Food safety & HACCP expert, certified trainer with the FDA and L.A. Health Department

UV Sanitizing Cashdrawer will eliminate virtually all infectious germs living on cash in the course of a normal business operation. Simply closing the **UV Sanitizing Cashdrawer** will kill germs while protecting the business, customer, employee, and product. **UV Sanitizing Cashdrawer** protection costs pennies a day and delivers results day-in and day-out, for years.

A single store with 5 drawers will spend about 33 cents per day for the **UV Sanitizing Cashdrawer** cash sterilization system (including the cost of the drawer).

The average length of ownership of a conventional cash drawer is 10 years and in that amount of time, the **UV Sanitizing Cashdrawer** system would save a minimum of $2 per day of employee sick time.



Using our **UV Sanitizing Cashdrawer** Germicidal & Anti-Microbial Cash Sterilization system in your stores will substantially benefit your company, customers, and employees.

Financial Benefits and soft ROI of 2015-16 cold and flu season marketing campaign.

UV Sanitizing Cashdrawer is going to aggressively target the National News network's seasonal obsession with all things related to cold and flu. The coverage of our product describing how it protects the consumer, how it stops the spread of illness, its relationship to our money supply, and more – will help establish the **UV Sanitizing Cashdrawer** brand in the most cost effective way possible. This will add up to millions of free marketing dollars for us and the corporations that install the **UV Sanitizing Cashdrawer** brand.
